Payeer Payment Gateway Configure Guide

How to follow "Payeer" Gateway rules and regulations. And also you can follow step by step in below given instructions, Which will be required to setup for payment methods.

Connecting To connect to Payeer

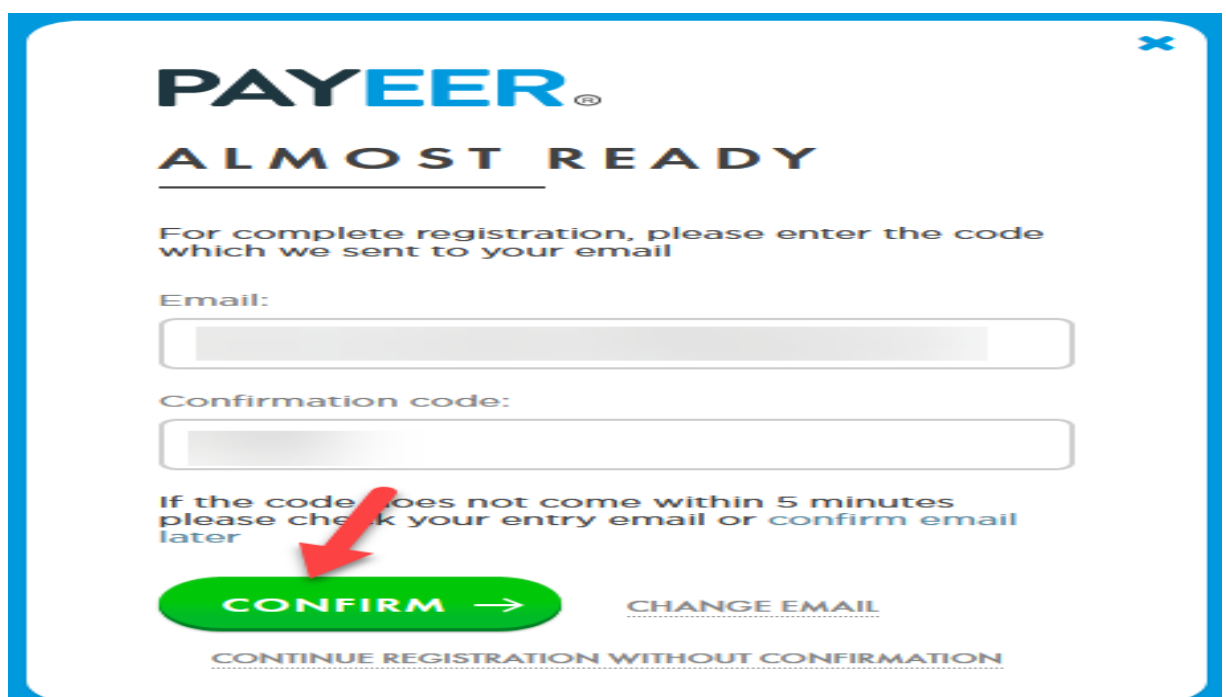

Firstly, Payeer account must be registered. Because without registration, You will not able to configure the setup of Payeer payment gateway Which we will require.

1. Go to Register for "Payeer" account.

The image shows a web browser window with the URL <https://payeer.com/en/account/?register=yes>. The page has a blue header and a white main area. The Payeer logo is at the top, followed by the text "ALMOST READY". Below this, it says "Enter your email address to complete the registration". There is an "Email:" label and an empty text input field. Below that is a "Security Code:" label and a security code input field showing the digits "6 6 2 5 2". A checkbox is present with the text "Confirming registration you agree to **RULES** of payment system.". At the bottom is a green "SIGN UP →" button.

2. After registration, Confirmation code has been sent to registered own mail id. And you can check that Mail code has gotten and do copy and paste it on “payeer” Confirmation code. After that you are going to next “payer” Password Settings.

The image shows the next step in the Payeer registration process. It has the same blue header and white main area. The Payeer logo is at the top, followed by "ALMOST READY". Below this, it says "For complete registration, please enter the code which we sent to your email". There is an "Email:" label and an empty text input field. Below that is a "Confirmation code:" label and an empty text input field. A red arrow points to the "CONFIRM →" button. Below the button is the text "If the code does not come within 5 minutes please check your entry email or confirm email later". To the right of the "CONFIRM" button is a link "CHANGE EMAIL". At the bottom is a link "CONTINUE REGISTRATION WITHOUT CONFIRMATION".

3. After password , you have reached the “Password” Page. And Secret Word & Account Name must be noted, Because there will need for these “**Secret and Account name**” to configuring time.

PASSWORD SETTINGS

After the password will be set, save it in a safe place.

New password:

Only complicated passwords which contains no less than 1 capital letter and 1 digit.

Repeat new password:

Secret word:

Be sure to remember the secret word, it is necessary to restore access to your account

Account name:

It is necessary to mention your account in the chat and forum

Go to Settings to activate Windows.

Mass Payouts

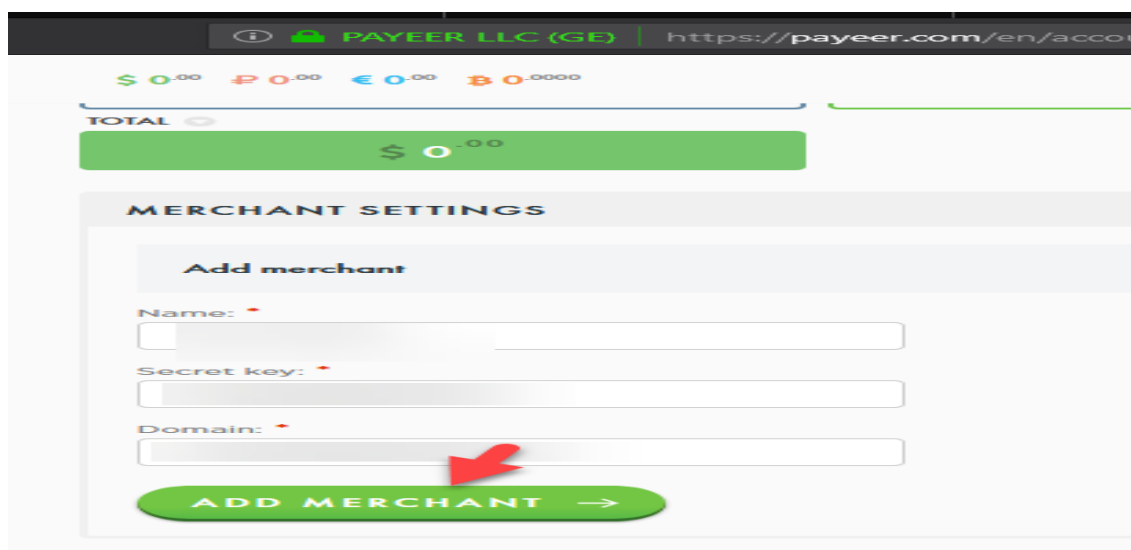

How to create a merchant id and configuring to payment setting account, Which will you do want to setup in admin “payment setting”.

4. Go to “Merchant Settings” and do click.

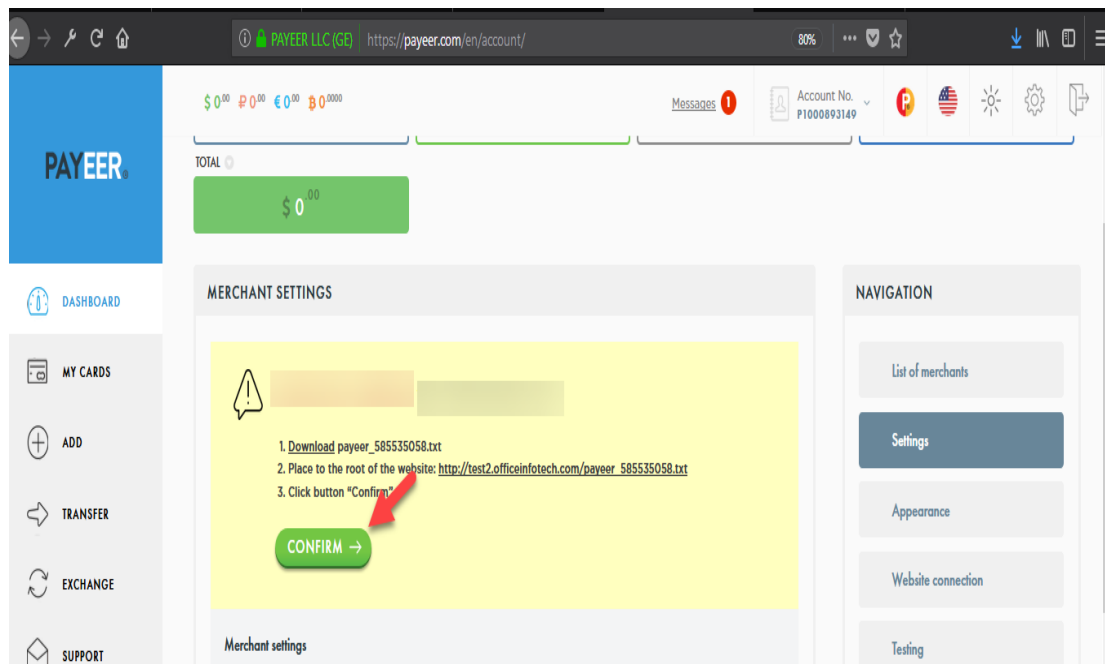

5. And go to click the “Activation” tab. And Following to these mandatory fields and put the address, which you want.

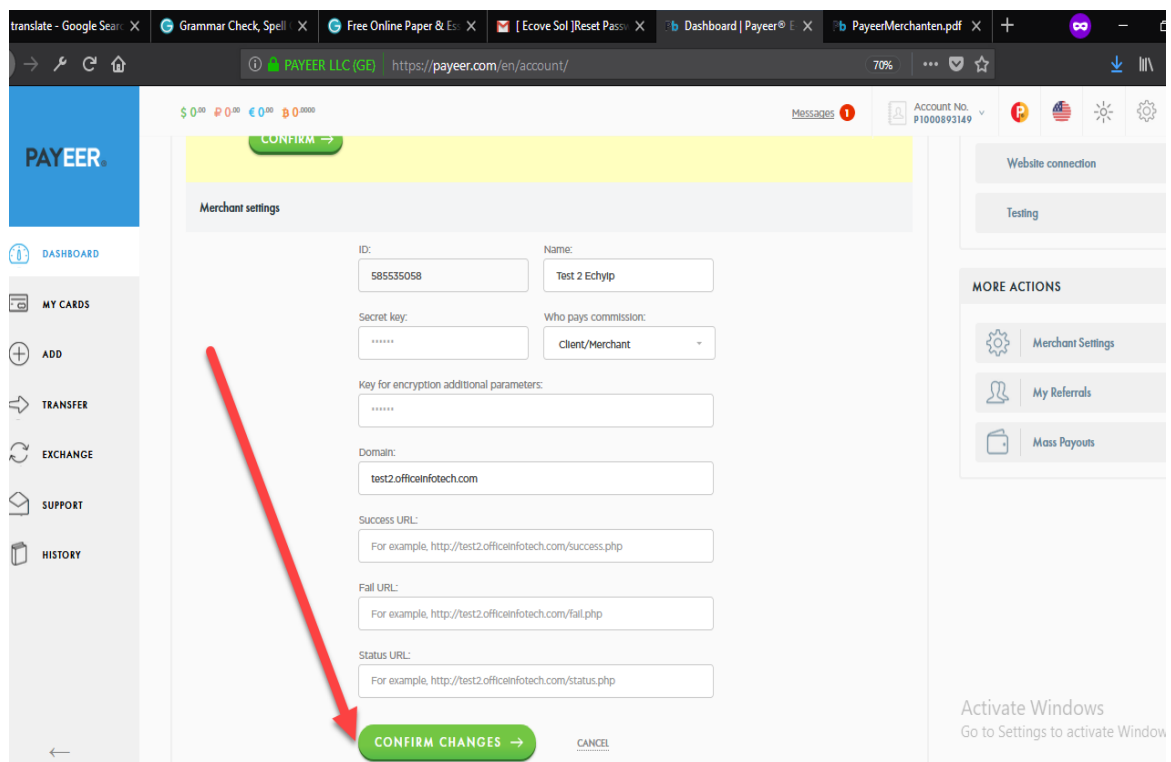

1. **Name:** Enter the name “Test 2 Echyip”
2. **Secret Key:** This key is auto-generated key.
3. **Domain:** The domain you want to keep. And want to configure it from your own domain. And confirm it.

6. After merchant confirmed. And you can download the “Payeer” account txt file. This file go to upload to root of Domain. And click button of confirm.

7. you can following these fields to setup of payment fields , Which we need to setup set to the values on coding end.

And submit the merchant moderation. only the owner of the merchant can perform payment as long as this person has already logged into Payeer.

8. Setting up the Merchant :

In the "Settings" tab, you can:

1. Enter a new secret code (unfortunately, it is not possible to view the old code for security reasons, but you can always replace it with a new one).

2. Establish who will pay fees:

- 2.1. **By Default:** the customer pays the fee for the selected payment method and the merchant pays a fee to Payeer (by default, 0.95%); the amount of the invoice minus 0.95% is added to the merchant's account.

- 2.2. **Customer:** The payment method's fee and Payeer fee are both paid by the customer and the full price of the invoice is added to the merchant's account

- 2.3. **Merchant:** The payment method's fee and Payeer fee are both paid by the merchant, and the price of the invoice minus both fees is added to the merchant's account.

3. Enter a key for encrypting additional parameters if you are planning to transfer them to the payment form or you need dynamic interaction addresses (success, fail, or processor's address).

4. Enter the addresses of successful and failed payments and the payment processor

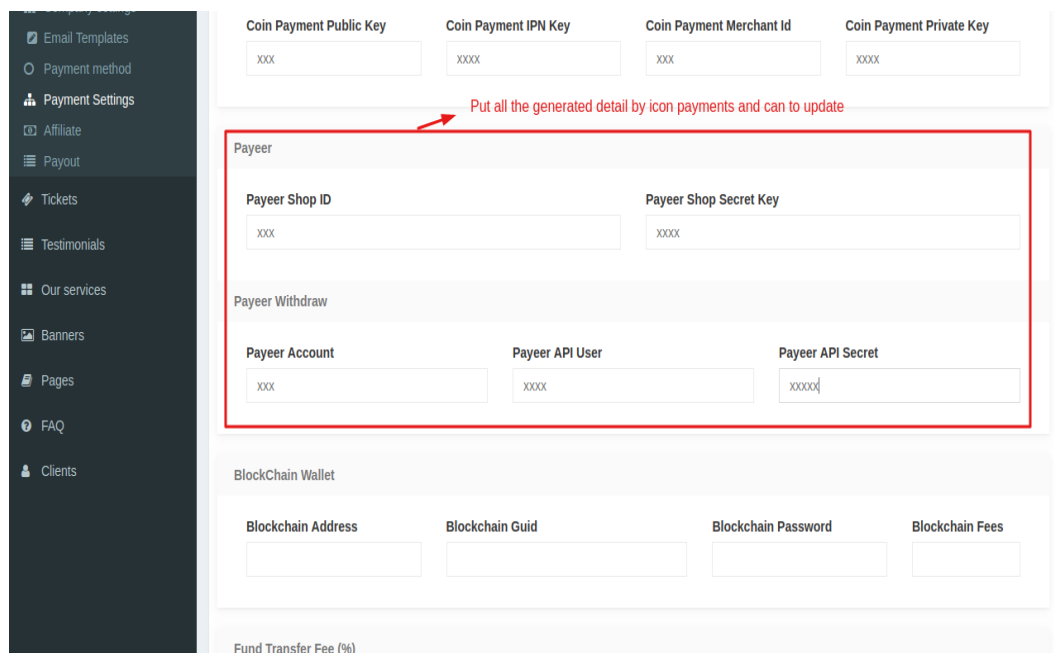

5. Select a notification server (by default, the server is selected automatically when a notification is sent). In the "Appearance" tab you can disable unneeded sections and payment methods or set only the currencies you need. Methods unavailable for direct payment of the invoice are 2 grayed out, but your customer can always add funds to their internal Payeer account and then pay your invoice from that account. After clicking on these methods, the customer is provided with detailed instructions on how to return to paying your invoice. In the "Website connection" tab you can download a ready-made module for your CMS and find examples for manual connection. To test a signature that has been generated, you can use the tab of the same name in the merchant's setting.

9. Add API user settings for following.

The screenshot shows the 'API-USER SETTINGS' interface. On the left, there's a form titled 'Add API user' with three input fields: 'Name' (filled with 'API'), 'Secret key' (filled with 'unnXlEXR6UpbbLrF'), and 'IP' (filled with '*****'). Below these fields is a green button labeled 'ADD API-USER →'. On the right, there's a 'NAVIGATION' sidebar with three buttons: 'Documentation', 'Payment systems', and 'Activation' (which is highlighted in blue). A red arrow points from the 'Activation' button to the 'ADD API-USER' button. Below the 'NAVIGATION' sidebar is a 'MORE ACTIONS' section with two buttons: 'My Referrals' and 'Activate Windows' (with a subtext 'Go to Settings to activate Windows.').

And update to API, You want to your choice.

And Back to Main Script in admin panel. And put the id:

The screenshot displays the 'Coin Payments' configuration interface in an admin panel. On the left is a dark sidebar with navigation links: Email Templates, Payment method, Payment Settings (highlighted), Affiliate, Payout, Tickets, Testimonials, Our services, Banners, Pages, FAQ, and Clients. The main content area contains several sections: 'Coin Payment' with fields for Public Key, IPN Key, Merchant Id, and Private Key; a red-bordered box labeled 'Payeer' containing 'Payeer Shop ID', 'Payeer Shop Secret Key', 'Payeer Withdraw', 'Payeer Account', 'Payeer API User', and 'Payeer API Secret'; 'BlockChain Wallet' with fields for Address, Guid, Password, and Fees; and a 'Fund Transfer Fee (%)' field at the bottom. A red arrow points to the 'Payeer' section with the text 'Put all the generated detail by icon payments and can to update'.

And update it.

yments Coin Request Supported Coins Store Directory

Log In

2 Factor Authentication

We have sent a message to your email address on file with an authentication code. Once you receive it enter the code below to complete your login.

Code: 

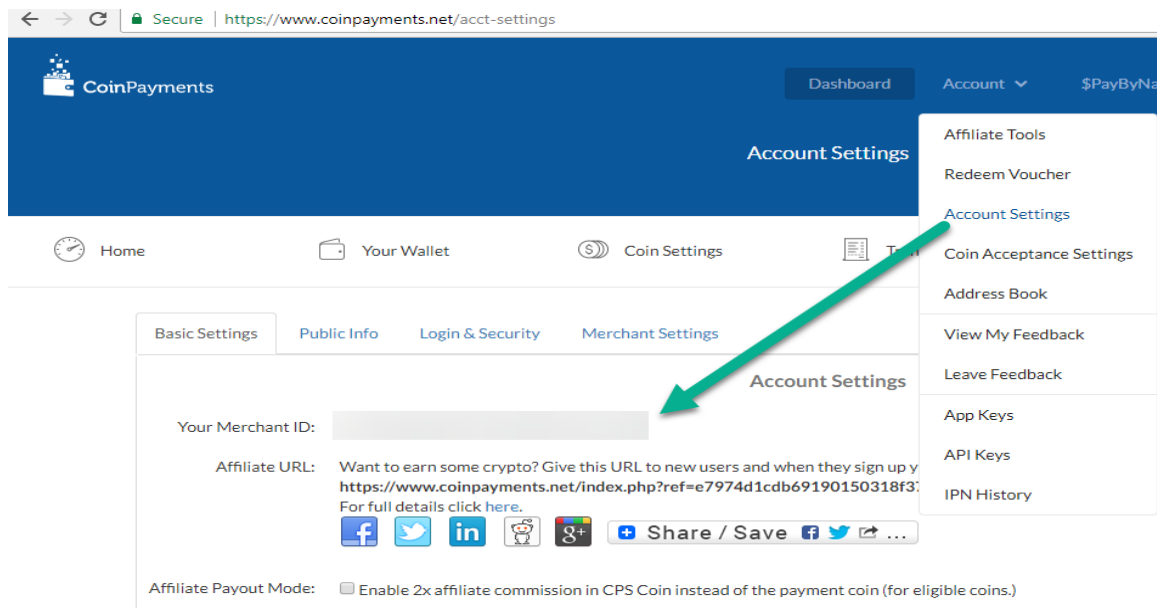

Log In

3rd Step: We must require to these things for integrated the cryptocurrency like “Bitcoin , LTC, CPS-COIN, Ripple”, Which you want to wish select in coin payments.

Need for that things integrate to setup of bitcoin cryptocurrency.

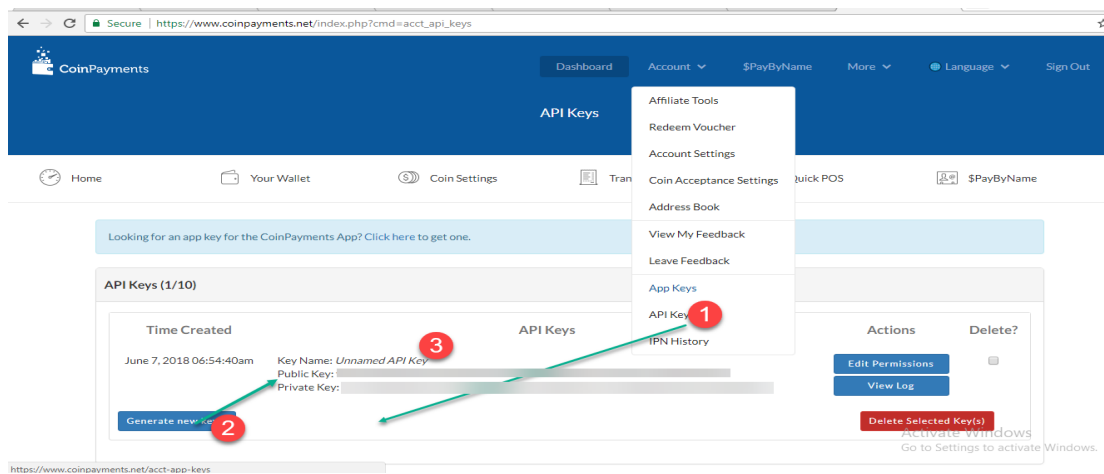

- ***Coins Payments Merchant id:*** Put in merchant id in your admin, which id you have generated in coin-payments account.

You can Go to the menu bar. And select to “Account” drop-down > click on “Account -settings” and Showing account page for “your merchant id”. Select to copy merchant id and paste on which section you have to put on “merchant id field.”

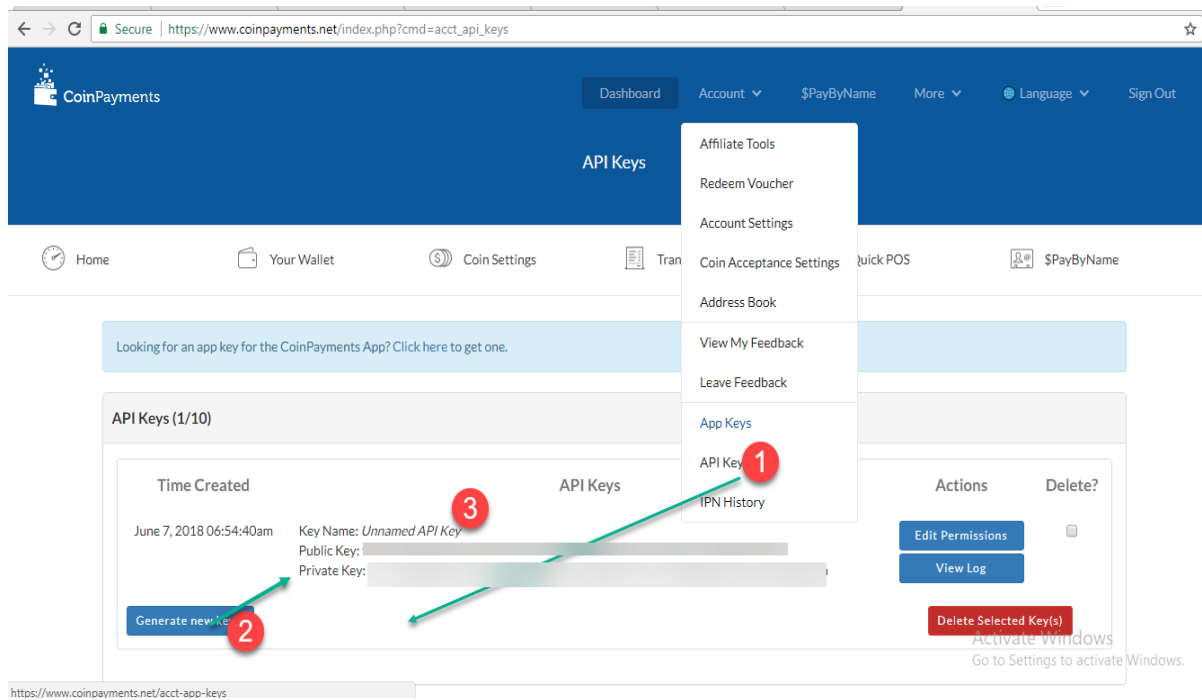

- **Coins Payments Public Key:** After merchant id , You will go to menu bar & select to “Account” Drop-down and after go to select “> API KEYS”.

You will click on “generate new key” for API Keys section. After generating the key, Key is showing for “Public key”.

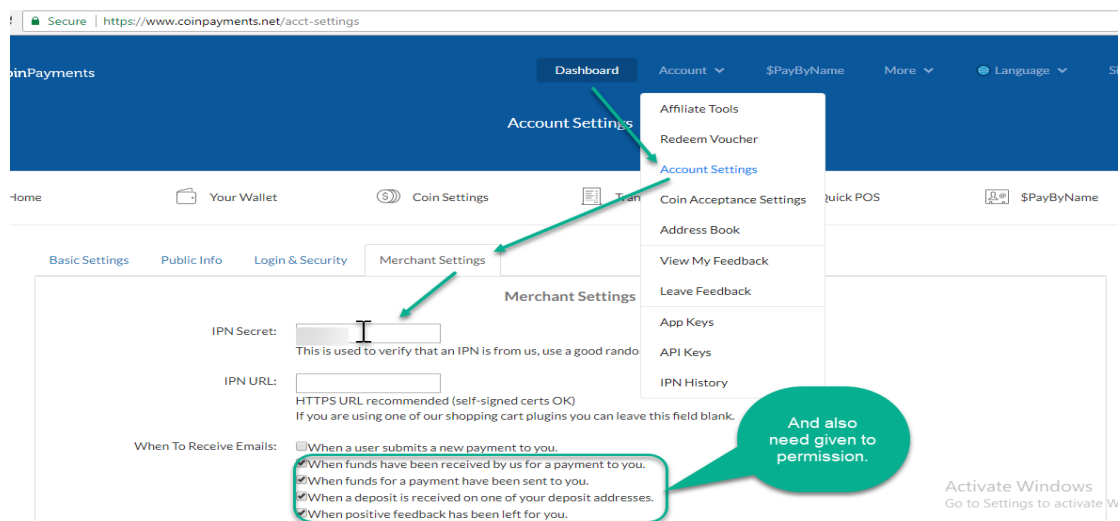

- **Coins Payments Private Key:** After generating public key , You will go to menu bar & select to “Account” Drop-down and after going to select “> API KEYS”.

You will click on “generate new key” for API Keys section. After generating the key, Key is showing for “Private Key”. Highlight key text should be copy and paste on your admin in under “Private key” field.

➤ **Coins Payments IPN Key:** After generated private key , You will go to menu bar & select to “Account” Drop-down and after going to select “> Account Settings”.

You will click on “Merchant settings” for under Merchant section. Put the Secret IPN in “IPN Field”. Which will want to put. But Mainly thing , IPN must be put robust key,Who will nobody can’t guess and those put secret key must not be shared.

4th Step:

In Admin, “Payment settings” page for put in under details of “Bitcoin Settings” section. And update it.

5th Step:

Main Thing:

Before, Admin can ready to check for “Make a deposit and request for withdrawal”.

It’s working fine or not. First of all , You must need gives permissions to API keys for getting withdrawal request and make a invest plan. Then check payment process, it’s working properly or not. And also check it history logs who payment has success or decline.

API Key Permissions

Command	Allow Access
get_basic_info	<input type="checkbox"/>
set_basic_info	<input type="checkbox"/>
create_transaction	<input checked="" type="checkbox"/>
get_tx_info	<input type="checkbox"/>
get_callback_address	<input type="checkbox"/>
rates	<input checked="" type="checkbox"/>
balances	<input type="checkbox"/>
get_deposit_address	<input type="checkbox"/>
create_transfer	<input type="checkbox"/>
Allow auto_confirm = 1 in create_transfer (not recommended unless you absolutely need it)	<input type="checkbox"/>
create_withdrawal	<input checked="" type="checkbox"/>
Allow auto_confirm = 1 in create_withdrawal (not recommended unless you absolutely need it)	<input checked="" type="checkbox"/>
create_mass_withdrawal	<input type="checkbox"/>
get_withdrawal_info	<input type="checkbox"/>
convert	<input type="checkbox"/>

To must have mandatory permission for making Withdrawl.

Activate Windows
Go to Settings to activate Windows.

3.

API Key Permissions

Command	Allow Access
get_basic_info	<input type="checkbox"/>
set_basic_info	<input type="checkbox"/>
create_transaction	<input type="checkbox"/>
get_tx_info	<input type="checkbox"/>
get_callback_address	<input checked="" type="checkbox"/>
rates	<input type="checkbox"/>
balances	<input type="checkbox"/>
get_deposit_address	<input type="checkbox"/>
create_transfer	<input type="checkbox"/>
Allow auto_confirm = 1 in create_transfer (not recommended unless you absolutely need it)	<input type="checkbox"/>
create_withdrawal	<input type="checkbox"/>
Allow auto_confirm = 1 in create_withdrawal (not recommended unless you absolutely need it)	<input type="checkbox"/>

This case gives permission for make a deposit.

Activate Windows
Go to Settings to activate Windows.

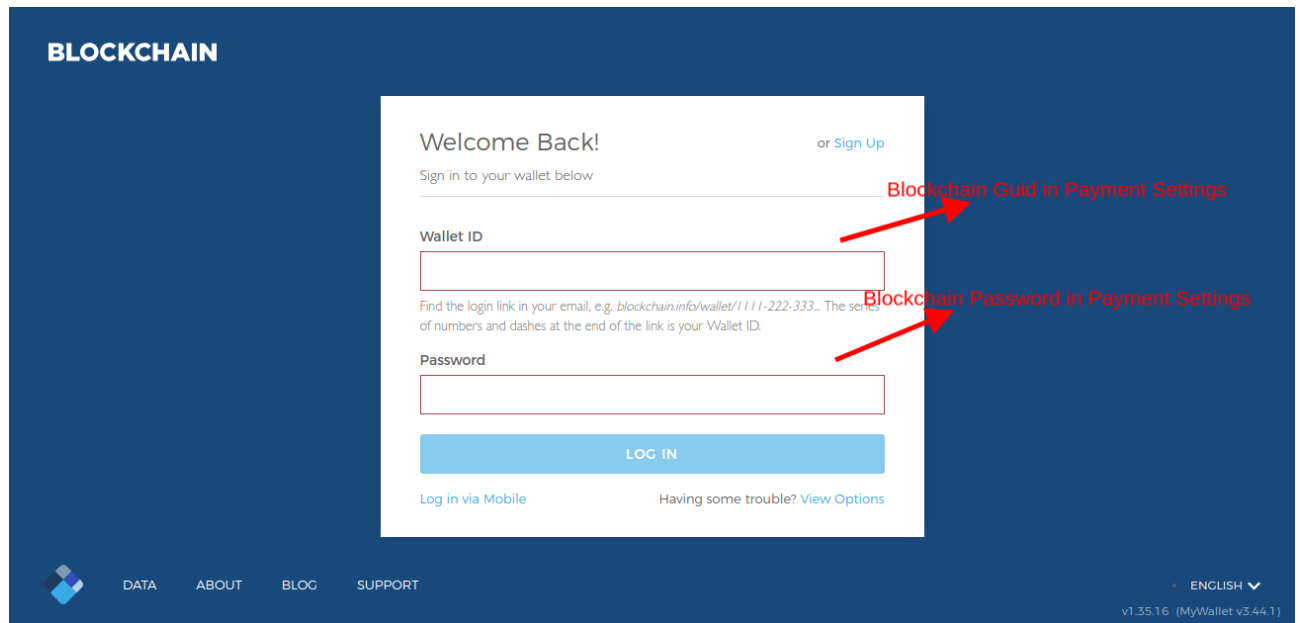

And Update to it.

Blockchain Guide for payment settings

Please Go to <https://login.blockchain.com/#/login/>

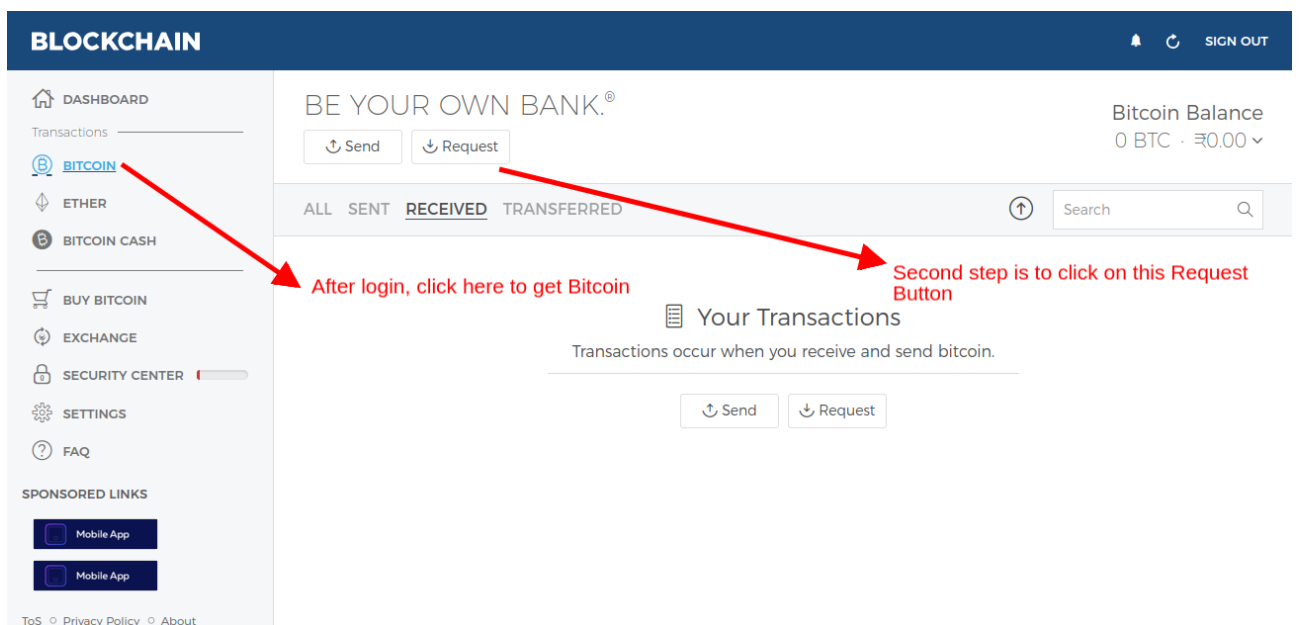

Wallet ID is your Blockchain Guid in the payment Settings

Password id Blockchain Password in the payment settings

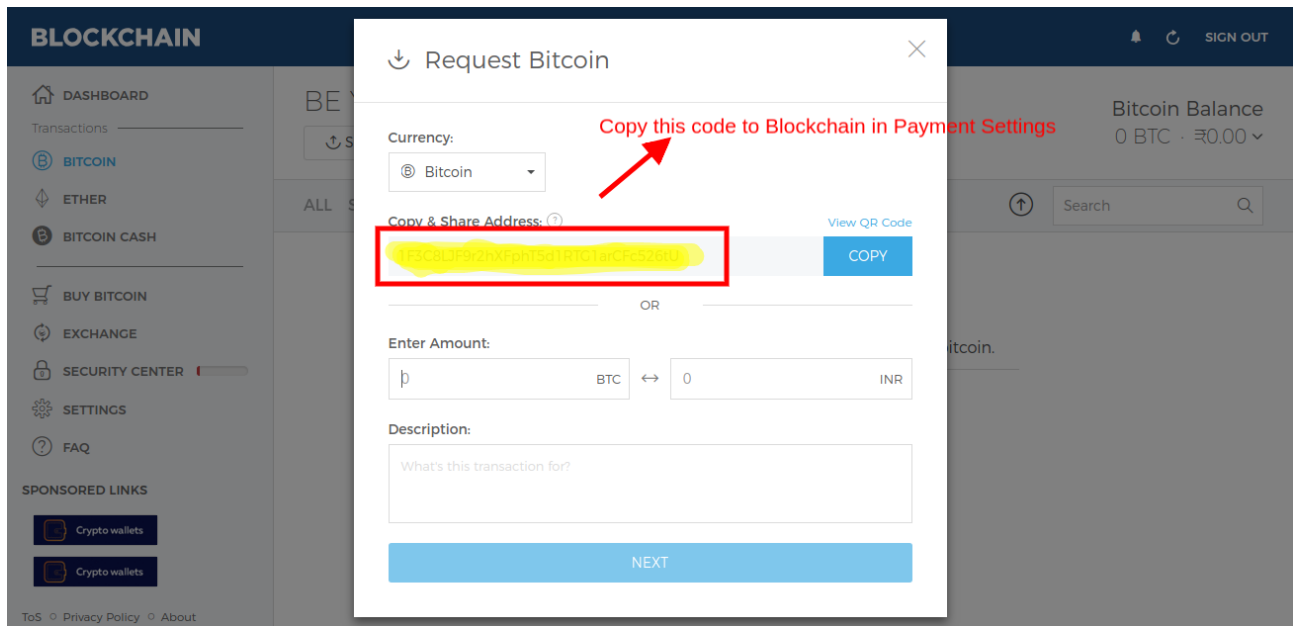

The screenshot shows the Blockchain login page. At the top left is the 'BLOCKCHAIN' logo. The main heading is 'Welcome Back!' with a link 'or Sign Up'. Below it is the instruction 'Sign in to your wallet below'. There are two input fields: 'Wallet ID' and 'Password'. A red arrow points from the text 'Blockchain Guid in Payment Settings' to the 'Wallet ID' field. Another red arrow points from the text 'Blockchain Password in Payment Settings' to the 'Password' field. Below the fields is a blue 'LOG IN' button. At the bottom left of the login box are links for 'Log in via Mobile' and 'Having some trouble? View Options'. The footer contains navigation links: DATA, ABOUT, BLOG, SUPPORT, and a language selector set to 'ENGLISH'. The version 'v1.35.16 (MyWallet v3.44.1)' is shown in the bottom right.

After login. Go to “Bitcoin” Menu at left side. Then click on the Request tab as seen in the screenshot.

The screenshot shows the Blockchain dashboard after login. The left sidebar has a 'DASHBOARD' section with 'Transactions' expanded, showing 'BITCOIN', 'ETHER', and 'BITCOIN CASH'. A red arrow points from the 'BITCOIN' link to the text 'After login, click here to get Bitcoin'. The main area has a header 'BE YOUR OWN BANK.®' and a 'Bitcoin Balance' of '0 BTC · ₹0.00'. Below this are 'Send' and 'Request' buttons. A red arrow points from the 'Request' button to the text 'Second step is to click on this Request Button'. The 'RECEIVED' tab is selected in the transaction filter. Below the filter is a search bar and a 'Your Transactions' section with the text 'Transactions occur when you receive and send bitcoin.' and 'Send'/'Request' buttons. The footer includes 'ToS', 'Privacy Policy', and 'About' links.

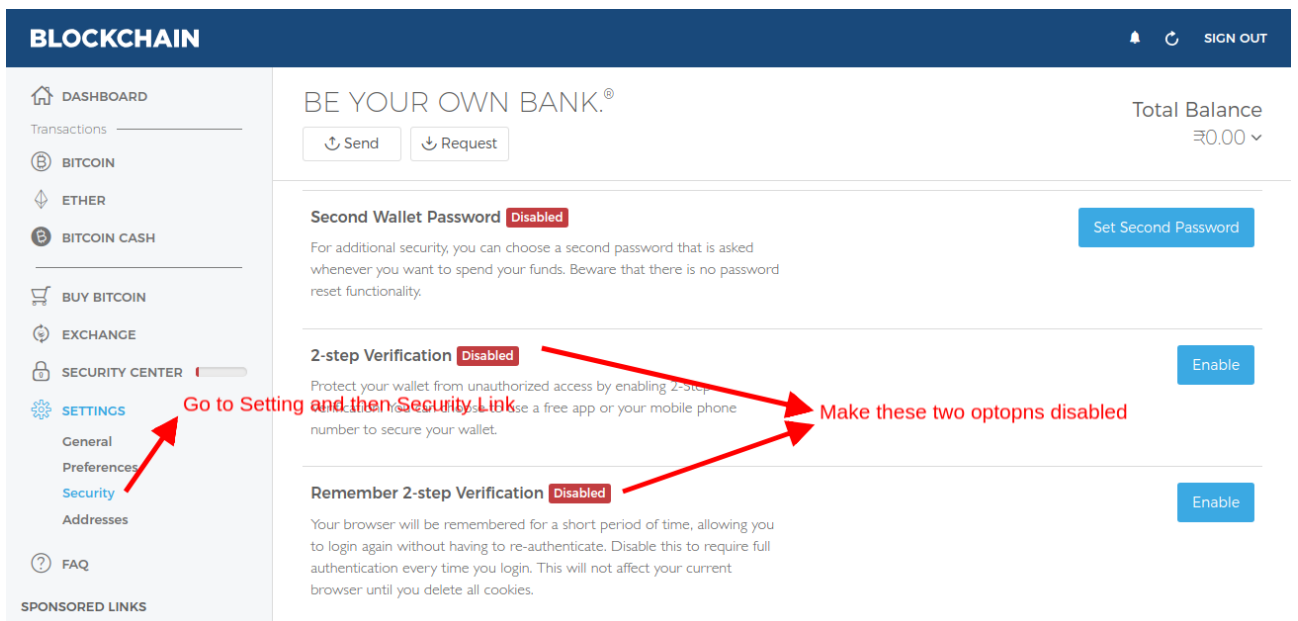

A popup is opened. Here you get the field value of the Block chain Address. Please check the below screenshot

Save all this information in the Payment Settings in Admin Panel.

Now Go the Setting menu at bottom in left side bar. There are two function need to be disabled.

- 1) 2-step verification
 - 2) Remember 2-step verification
- Like the following screenshots.

Your blockchain implemented successfully.
